## The right way to avoid the wrong size.

Correct tension is vital! Inaccurate tension results in a garment either too big or too small. Even a variation of half a stitch makes a difference and could result in your garment pilling or rubbing.

## HELPFUL HINTS — SHAPING IN LACY PATTERNS

It is most important to become familiar with the appearance of the pattern, so that you can decide on the best way to do your shaping.

Always look a little way into your row before shaping — e.g. If your row would normally begin with "K 1, y fwd, K 2 tog" and you wish to decrease at the beginning of the row, it would be best to just omit the "y fwd" — this would decrease a stitch but still keep the line of the pattern following up. Similarly, if your row would normally begin with "K 1, K 2 tog, y fwd", it would be best to work "K 3 tog, y fwd".

If you have decreased any number of stitches, and you are not sure how to begin and end your rows, remember — do not work a "y fwd" if you have no room in the pattern to "K 2 tog" or "sl 1, K 1, pss0" to compensate for it (and vice versa).

A piece of graph paper can be helpful in "mapping out" shapings in pattern — draw your pattern out using suitable symbols for "y fwds" and "K 2 togs", then mark along the lines where your decreasing (or increasing) should be worked.

If you are still in doubt, it is a good idea to count the number of stitches on your needle after working each pattern row.

## Avoid colour mis-match

Buy up first rather than match up later. It's important you buy enough yarn in the first place to complete your garment. With any brand, shade variations can occur between dyelots. It's also a good idea to keep all the ball bands, to help us help you if you have an enquiry.

#### Variations in specified yarn quantities for garments.

Knitters occasionally comment that the quantity of yarn recommended for a garment varies from the amount they actually use. One major reason for this is that no two people knit or crochet in exactly the same way. When we specify a quantity of yarn for a particular garment, we are stating a figure that is the end result of having each individual design made by as many as six different knitters.

The average quantity determined by this check knitting is regarded as the most satisfactory figure for that particular garment, knitted at the **correct tension\*** to the measurements specified and in the actual yarn recommended. Naturally, if you decide to change the body or sleeve length **you must allow for an adjustment to the quantity of yarn.**

\* **Correct tension**—see tension instructions for your garment.
